# New FamoStorage Modular Storage System

# Assortment

## The Concept:

Every hospital has to store their sterile medical equipment, but they all have their own demands and requirements. Based on it's years of experience Famos fully understands that no hospital is the same or is using the same processes.

For this reason Famos designed an assortment of stainless steel storage systems called "FamoStorage" to cater to your needs.

Whether you use sterilization containers, wrapped instruments in baskets or wire shelves, with the "FamoStorage" system you can store them in a safe, hygienic and efficient way.

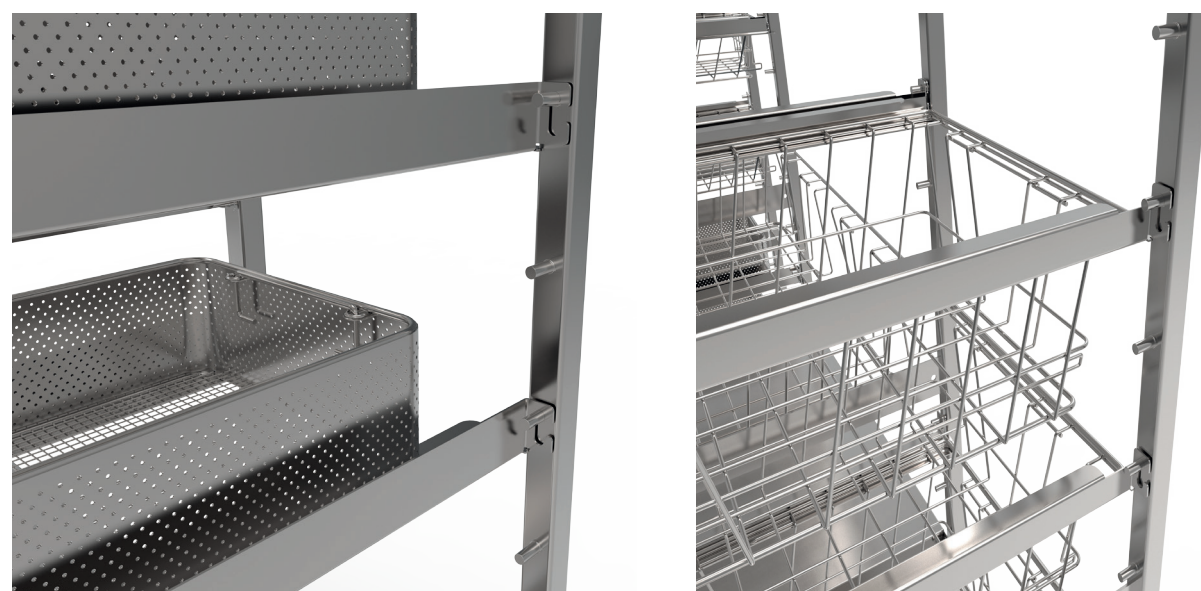

The Modular system allows you to make your own set-up. Not only is it easy to install, but also easy to extend. It doesn't matter if you need U-profiles, L-profiles, solid stainless steel shelves or perforated stainless steel shelves.

With our flexible system you can make it in the way you want and change it afterwards if needed.

For a hygienic finish you can equip your storage system with stainless steel sloping roof. This prevents dust gathering on the top of the shelving system.

The "FamoStorage" has a height of 2100mm and has a storage capacity of 1200kg per section and per shelf 600-1200mm 150kg, 1200-1500mm 100kg. Loading pins are standard fabricated every 100mm. Changes are possible.

**If your requested product is not in our standard assortment, feel free to contact us and we will make it to your custom requirements.**
