FamoVision

Perfection into Every Detail

The Concept:

Every hospital and CSSD needs a clear vision to evaluate the cleanliness and functionality of instruments, especially fragile and delicate instruments. To do so requires a magnification lamp with additional light or just an extra light.

With this in mind, Famos have created just such a range of high-quality magnification lamps with LED light and LED support lamps. All magnification lamps have changable LED lights and changable lenses. A dimming function with 5 intensities along with a table clamb and interchangeable lenses with different Diopters.

All support lights have dimming function with 5 intensities and a table clamp as well.

All items are CE and TÜV certified.

The range:

9002LED

Lens size: 189x157mm
3 or 5 Diopter
